

## **Acknowledgments Policy for the use of the Clemson University Genomics and Bioinformatics Facility's infrastructure**

While we are a fee-for-service resource on Clemson University's campus, this does not exempt the user from acknowledging the facility and our funding sources when data generated using CUGBF resources appear in publications, projects, and research. While there is no cost for the use of CUGBF's software modules and scripts for the pipelines designed by the staff of CUGBF, we request that all results generated using CUGBF infrastructure (instrumentation, software, and scripts) include an acknowledgment statement. CUGBF receives support in part from the College of Science and 2 IDeA NIH grants.

By reading and signing under the below statement, you agree to abide by this acknowledgment policy. Upon receipt of this document by CUGBF, you will be granted access to the facility's infrastructure.

I agree to acknowledge the Clemson University Genomics and Bioinformatics Facility (CUGBF), the College of Science, and the 2 Institutional Development Awards (IDeA) from the National Institute of General Medical Sciences of the National Institutes of Health: P20GM146584 and PM20GM139769 in any presentation or publication where I used their infrastructure, including instrumentation, software, or scripts. I furthermore agree not to divulge the location of the software or the scripts to anyone who has not also signed this Acknowledgment Policy.

Additionally, please review the authorship guidelines linked below and in cases where a CUGBF staff member's intellectual capital lead to de novo pipeline creation/findings/results benefiting a project's outcome(s), we ask that you consider co-authorship or formal mention of the staff member in the acknowledgment's section, as is appropriate.

### **Sample acknowledgment statements:**

i) "This [(publication), (project), or (research)] was made possible, in part, with support from the Clemson University Genomics and Bioinformatics Facility, which receives support from the College of Science and two Institutional Development Awards (IDeA) from the National Institute of General Medical Sciences of the National Institutes of Health under grant numbers P20GM146584 and P20GM139769."

ii) "We acknowledge the assistance of [name(s) of staff member(s)] of the Clemson University Genomics and Bioinformatics Facility for services and facilities provided. The facility is supported by the College of Science and Grants P20GM146584 and P20GM139769 Institutional Development Awards (IDeA) from the National Institute of General Medical Sciences of the National Institutes of Health."
